PROFESSIONAL SUMMARY

Creative Technologist and Software Engineer specializing in 3D WebGL experiences, modern web applications, full-stack systems, and AI integration. Passionate about building performant, interactive digital products that inspire users.

CORE TECHNICAL SKILLS

- 3D & Graphics: Three.js, WebGL, Canvas API, Shaders (GLSL), GSAP, 3D Math
- Frontend: JavaScript (ES6+), TypeScript, React, HTML5, CSS3, Modern UI/UX
- Backend & Cloud: Node.js, Express, Python, REST APIs, Linux/Bash, Serverless
- Tools & Workflow: Git, GitHub, Docker, Postman, Vite, Performance Profiling

FEATURED ENGINEERING PROJECTS

1. 3D WebGL Holographic Portfolio

- Built high-performance 3D interactive web environment with Three.js.
- Integrated real-time particle dynamics, sound synthesizer, and CLI terminal.

2. Polaris - Multimodal AI Intelligence Assistant

- Engineered autonomous AI agent architecture with tool-calling hooks.
- Designed responsive dashboard with real-time audio telemetry.

3. DegreePilot - Educational Intelligence Portal

- Developed modern curriculum platform with interactive progress analytics.

4. CyberGuard Network & Security Suite

- Security automation scripts for network packet analysis and auditing.

EDUCATION

Bachelor of Technology in Computer Science & Engineering
